

Dual-Mode (WiFi/GSM) Wireless Service

INTRODUCING CANADA'S FIRST DUAL- MODE (WIFI/GSM) WIRELESS SERVICE

Harmony Mobile is proud to introduce Canada's first dual-mode (WiFi/GSM) wireless service for business customers. This advanced wireless

solution allows Canadian businesses to enjoy high quality business-class wireless services not only in hundreds of countries, but also in places where GSM coverage is not available or undesirable, such as remote area or high-rise office buildings.

“

I can now use my wireless phone in places that I have never dreamed of. And, I don't need to sit in front of my PC to make inexpensive VoIP calls anymore.

”

With Harmony's Dual-mode (WiFi/GSM) wireless solution, you can make inexpensive VoIP calls wirelessly in your office environment using the same mobile device. No more sitting in front of your PC to make those unreliable, poor quality Peer-to-Peer VoIP calls or remembering those complicated SIP numbers. Your Harmony mobile device selects the best wireless network to complete your call to save you money.

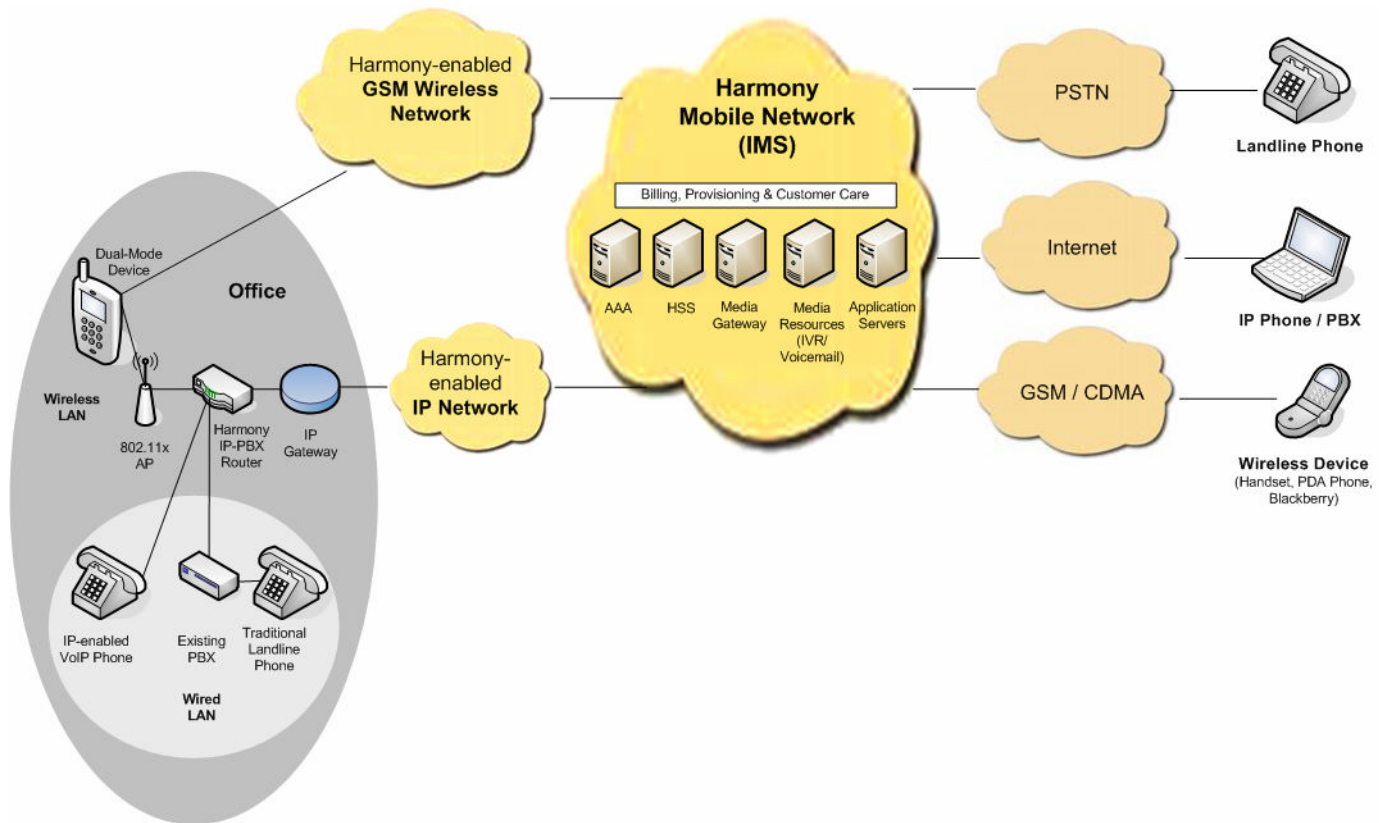

- Make WiFi phone calls where cellular service is weak or unavailable
- Better in-building wireless service
- VoIP without the PC
- Save money on voice roaming fees
- Save money on long distance fees
- Best for inter-office communication
- Use the same phone for regular GSM wireless calls
- Reliable business-class service backed by SLAs
- Superior voice quality

Be first to IMS. Be first to Harmony.
